VERIFICATION OF A TRANSLATION

I, Charles Edward SITCH BA,

Deputy Managing Director of RWS Group Ltd UK Translation Division, of Europa House, Marsham Way, Gerrards Cross, Buckinghamshire, England declare:

That the translator responsible for the attached translation is knowledgeable in the French language in which the below identified international application was filed, and that, to the best of RWS Group Ltd knowledge and belief, the English translation of the international application No. PCT/FR03/01661 is a true and complete translation of the above identified international application as filed.

I hereby declare that all the statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the patent application issued thereon.

Date: December 1, 2004

Signature: 6.1.16h

For and on behalf of RWS Group Ltd

Post Office Address:

Europa House, Marsham Way,

Gerrards Cross, Buckinghamshire,

England.

(54) Title: DEVICE FOR PRODUCTION OF A PLASMA SHEET

(54) Titre: DISPOSITIF DE PRODUCTION D'UNE NAPPE DE PLASMA

(57) Abstract: The invention relates to a device for the production of a plasma (16) within a housing comprising means for the generation of energy in the microwave spectrum. for the excitation of the plasma, said means comprise at least one basic plasma excitation device with a coaxial applicator (4) of microwave energy, one of the ends of which is connected to a production source (7) of microwave energy, the other end (8) of which is directed to the gas to be excited within the housing. The device is characterised in that each basic plasma excitation device is arranged in the wall (3) of the housing, each applicator (4) having a central core (5) which is essentially flush with the wall of the housing. The central core and the thickness of the wall (3) of the housing are separated by a space (6) coaxial to the central core, said space being totally filled, at least at the end of each applicator, by a dielectric material (14), such that said material is essentially flush with the level of the wall of the housing.

(57) Abrégé: L'invention concerne un dispositif de production d'un plasma (16) dans une enceinte comportant des moyens de production d'une énergie dans le domaine des micro-ondes en
